**WIRELESS TELECOMMUNICATIONS BUREAU SEEKS COMMENT ON REQUEST BY  
IEE SENSING INC. FOR DECLARATORY RULING OR, IN THE ALTERNATIVE, WAIVER  
OF PART 95 VEHICULAR RADAR RULES TO PERMIT STAND-ALONE OPERATION OF IN-  
CABIN SENSORS IN THE 76-81 GHz BAND**

**WT Docket No. 20-144**

**Comment Date: June 17, 2020**

**Reply Date: July 2, 2020**

On May 6, 2020, IEE Sensing Inc. (IEE Sensing) filed a Request for Declaratory Ruling or, in the Alternative, Waiver of Part 95 of the Commission's Rules (Request).<sup>1</sup> IEE Sensing seeks a Declaratory Ruling to confirm that stand-alone, in-cabin radar sensors<sup>2</sup> are not prohibited by part 95 of the Commission's Rules.<sup>3</sup> IEE Sensing asserts that the part 95 rules do not expressly preclude stand-alone, in-cabin sensor use, but that an entry in the Commission's Knowledge Database (KDB) contains a footnote that engenders uncertainty as to whether IEE Sensing may market such a system.<sup>4</sup> The company's VitaSense system is designed to detect children left in vehicles and transmit the information to the vehicle's warning systems.<sup>5</sup>

In case the Commission should disagree with its interpretation of the relevant part 95 rules, IEE Sensing, in the alternative, requests a waiver that would allow deployment of the VitaSense system. IEE Sensing argues that a waiver is warranted because its system would save the lives of children left behind in a vehicle, and that its system would do so in a manner that does not undermine any of the policies that

<sup>2</sup> According to IEE Sensing, its VitaSense system uses low-power radio frequency technology to detect vehicle occupants, including newborns, based on their movements or breathing, distinguishing them from inanimate objects. *Id.* at 1-2. The applicant implies that, in this context, "stand-alone" refers to "whether the in-cabin systems are configured to operate in conjunction with external radars, or on a stand-alone basis." *Id.* at 8.

underlie the part 95 rules for 76-81 GHz vehicular radars.<sup>6</sup> It asserts, in particular, that a waiver would cause no risk of harmful intra-system interference, because of the way in-cabin sensors can be deployed, and no risk of harmful health effects.<sup>7</sup>

We seek comment on all aspects of the IEE Sensing Request.
